INSTRUCTIONS FOR SETTING UP THE PHD MONITORING COMMITTEE AT ED211

This form aims at providing help for the assessment of the progress in the PhD project. The goal of this assessment is to generate a constructive discussion.

The committee assesses through an interview with the doctoral student, the conditions of his training and the progress of his research. It formulates recommendations and transmits a report on the interview to the director of the doctoral school, the doctoral student and the PhD supervisor. It takes particular care to prevent any form of conflict, discrimination or harassment. The PhD registration is renewed at the beginning of each academic year by the head of the establishment, on the proposal from the director of the doctoral school, based on the PhD supervisor’s and monitoring committee's opinions.

Composition of the PhD monitoring committee: Organized by the laboratory, it consists of at least three members:
- the PhD supervisor,
- two other people, where one must be external to the laboratory, and another one proposed by the doctoral student.

The external member brings an independent expertise and he must hold a doctorate. He(she) can belong to another UPPA laboratory. He may be chosen as a member for the PhD defense committee.

The member proposed by the doctoral student does not need to hold a doctorate. He(she) can be involved in the project in which the doctoral student works. He can also be a non-permanent staff such as a post-doctoral student for example.

The Chairman of the committee is appointed by the members of the committee.
The PhD supervisor cannot be Chairman.
The composition of the committee may vary from year to year.

Frequency of meetings: The committee meets at least once a year to assess the progress of the PhD (formal and scientific point of view) and it can intervene in the event of disputes or difficulties arising during the PhD.

In the event of a request to extend the duration of the PHD beyond three years, the date of the meeting of the monitoring committee must be fixed before the end of June of the 3rd year.

A detailed report must be attached to the form, along with information on the funding planned for the extension.

Functioning of the committee: Before the committee meeting, the PhD student will send the members of the Committee a brief report on the progress of this work, as well as a summary on his/her training.

During the Committee meeting, the PhD student presents the progress of his work, the training followed and presents his project for the next year.

The Committee will arrange a time of discussion for Committee members in the absence of the PhD supervisor, then in the absence of the PhD student. Finally he will draw up the interview report that the participants will sign.

Transmission of the committee report: The original of this form is to be sent to the doctoral school. A copy is kept by the PhD student, the PhD supervisor and the director of the host laboratory.
